

INTERAGENCY INTERACTION IN CMDR CONFERENCE

THEME	TOPIC	DESCRIPTION
<i>Collaborative Interaction – Implications on Security</i>	w/Academia and Industry (FFCI)	In order to be achieved relevant future capabilities, NATO explores concepts, conducts experiments and supports research and acquisition processes of new technologies. That complex topic areas, where technology and knowledge are fast developing, NATO and National Governments do not always possess all of the state-of-the-knowledge. Academia and Industry are obviously leaders in technology and knowledge. It is recognized that engaging Academia and Industry as early as possible will reduce risk and increase cost-effectiveness of capability development efforts.
	w/NGOs/Private sector	Synchronizing, coordinating, and/or integrating key players / stakeholders efforts IOT be achieved unity and to be promote unified action in dealing with complex crisis.
	w/EU	Sharing strategic interests and facing the same challenges, NATO and EU cooperate on issues of common interest and are working side by side in crisis management. In the current strategic environment, with unprecedented challenges cooperation between the EU and NATO is essential. The security of EU and NATO are inter-connected. Together they can mobilize a broad range of tools and make the most efficient use of resources to address those challenges and enhance the security of their citizens.
