INTRODUCTION

There are four large, world-renowned ski resorts in Bulgaria and a number of smaller ski zones which are developing rapidly and generate much interest. Bulgaria has more than 210 km of ski slopes. The highest of these trails start at an altitude of 2,600 m and have a maximum vertical drop of 1,630 m. All trails are serviced by modern chairlifts and cable cars in addition to ski tows. From early December to April conditions for winter sports are excellent due to the modern facilities and the well developed infrastructure. Also, most of the large ski zones make use of snow making equipment to augment the natural snow. This ensures an extremely high quality of snow throughout the entire season.

Ski schools in the primary ski zones employ the services of qualified instructors who provide lessons for both children and adults. Resorts in Bulgaria offer all inclusive package deals at affordable prices for a great winter holiday experience.
